REPORT ON

Tree Plantation

25th July2018

NSS GECP

Since the beginning, trees have furnished us with two of life's essentials, food and oxygen. As we evolved, they provided additional necessities such as shelter, medicine, and tools. Today, their value continues to increase and more benefits of trees are being discovered as their role expands to satisfy the needs created by our modern lifestyles.

"Preserving the tree is an obligation for everyone without exception; one tree will absorb approximately a ton of carbon dioxide during the course of its life cycle."

Government Engineering College, Palanpur organized a Tree Plantation Programme in the college and hostel premises on July 25, 2018 from 03:00 p.m. onwards. NSS candidates identified appropriate place for plantation and prepared it for plantation. We had planted various types of plants in college and hostel premises. Around 50 plants are planted in both the campuses. 50 more plants are planned to be planted in month of July 2018.

In the programme, Principal, HoD's, all the faculties members, staff members of Civil, Mechanical, Mining, Electrical and Science & Humanities departments, NSS volunteer and students have taken part in this social activity.

At the end of programme there was a photo session with Principal, HoD's, Faculties and students.
